Career Objective

Aspiring Machine Learning Engineer eager to apply statistical and computational techniques to solve real-world problems using data-driven insights.

Technical Skills

Programming: Python, R

ML Libraries: scikit-learn, TensorFlow, Keras, Pandas, NumPy

Concepts: Regression, Classification, Clustering, Feature Engineering, Model Evaluation

Visualization: Matplotlib, Seaborn, Power BI

Tools: Jupyter Notebook, Google Colab

Projects

Emotion Detection using BiLSTM & GloVe – Built a model to detect emotions in text using deep learning.

House Price Prediction – Applied Linear Regression and Random Forest on Kaggle dataset.

Customer Segmentation – Used K-Means clustering for targeted marketing strategy.

Certifications

Machine Learning by Andrew Ng – Coursera

Deep Learning Specialization – Coursera

Education

B.E. in Computer Science & Engineering – [Your College Name], 2026
