---

## Education

---

### Kolhapur Institute Of Technology

Kolhapur , Maharashtra

*B.Tech in CSE(AI ML)*

- Cumulative GPA : 8.02/10
- Relevant Course Work : Data Structure , Object Oriented Programming .

2022-2026

### Ichalkaranji Highschool and junior college Ichalkaranji

*Higher Secondary School Certificate*

2021 -22

- Percentage : 81.50 %

### M.G.Shaha Vidyamandir and Jr.College Bahubali

*Secondary School Certificate*

2019 -20

- Percentage : 97.00 %

## Technical Skills

---

- **Programming language** : Core Java , SQL
- **Data Structures And Algorithm** : Java
- **Web development technologies** : HTML, CSS, Javascript

## Projects

---

### Parkinson's Disease Prediction | ML , Flask

- Predict Parkinson's disease using machine learning techniques.
- Biomedical voice measurements or clinical features from patients.
- Train and test classification models like SVM, Random Forest, etc.

### Diabetes Prediction Using ML | ML , Flask

- Developed a machine learning model using Support Vector Machine (SVM) to predict diabetes based on medical diagnostic data.
- Performed data preprocessing, feature scaling, and model evaluation using Python libraries like Pandas, NumPy, and scikit-learn.
- Achieved high model accuracy through train-test split and performance tuning, ensuring reliable predictions.
- Demonstrated strong skills in data analysis, model building, and end-to-end ML pipeline development.

## Coading Profile

---

- Leetcode
